## 2011 AUTUMN SCIENCE BUZZ CAFÉ

at the *French Garden, Coffee Catz and Children's Museum*

Please note the special Science Buzz for December in Santa Rosa to get to know the Children's Museum of Sonoma County with Prof. Cominsky. And from chocolate to China: Before Columbus, Chinese explored the Americas bringing the arts and crafts of their civilization. Later, Europeans invaded the Americas and exploited, among other things, the wonders of chocolate. We have the scientific analysis of perpetual motion to the analysis of science itself. Also, we are graced with the earthly ways of animals, birds and herbs to the unearthly ways of Luther Burbank and Ancient Ones – the Pueblo People.
