

Science Buzz Cafe # 558

Monday 6 PM • December 8th, 2025

The HopMonk 'Abbey'

230 Petaluma Ave. Sebastopol, CA

Host, Daniel Osmer (daniel@economicbuzzcafe.com)

6 PM • Come Early for Food & Drink • RSVP \$7 • DOOR \$10

What if the Electrical Grid Fails?

How to get Off the Grid – Practical and Philosophic Considerations

A Talk by Chaz Peling

Solar Pioneer

40 years in the "Off-Grid" World of Solar Power Generation

Over the years, Chaz has provided off-grid solar power for the Gravenstein Apple Fair, local fairs and music stages – anywhere anytime! He will describe AND demonstrate the technology of off-grid solar power. Solar panels, controls, battery technology, and their integration has come a long way. From the early off-grid pioneer days in the Northern California hills to fulfilling the modern needs of power resilience and reliability; OFF-Grid Solar Power is more secure than the failing PG&E grid.

It is better to Own your own Power rather than rent it!

A significant obstacle to adopting solar power is not the technology but the psychology of the user and the current state of modern finance. Anywhere anytime, run a music stage or festival, run a house, trailer or remote worksite, or well pump off-grid without fuel, noise or fumes.
